

Conditional Request for Constructive Assistance

Therefore it is submitted that patentable subject matter is clearly present. If the Examiner agrees but does not feel that the present claims are technically adequate, applicant respectfully requests that the examiner write acceptable claims pursuant to MPEP 707.07(j).

Conclusion

Kinetic display devices based on this Patent Pending Application have been a success in the commercial marketplace. They are being marketed by Writestick Inc. See website www.writestick.com. Writesticks were marketed during the 2002 Winter Olympic Games with good success. Country music singing group SheDaisy has purchased Writesticks to sell as collectables to promote their group. See website www.shedaisy.com. Writesticks are sold during live concerts which allows the audience to interact with the group during the concert. The audience becomes part of the concert. SheDaisy has approached the inventor of this display device with a request to design a large scale display device based on the technology contained in this patent application. The large scale devices will be placed around the darkened venue in which the singers are performing. During the concert, the devices will cause the words to the songs that are being sung to be visible floating in mid-air around the concert venue.

This technology is unique, unobvious and is being sought out by commercial applications on a regular basis.

For all the reasons given above, applicant respectfully submits that the specification and claims are now in proper form, and that the claims comply with Section 112, the claims define over the prior art under Section 102, and the claimed distinctions are of patentable merit under Section 103. Accordingly, applicant submits that this application is now in full condition for allowance, which action applicant respectfully solicits.

Very respectfully

Arthur Lane Bentley
